Education

Northeastern University, Khoury College of Computer Sciences, Boston, MA — *Sep 2022 - Present*
MS in Artificial Intelligence — *GPA: 3.83/4.0*
Graduate Teaching Assistant: Data Mining Techniques, Intro to Programming for Data Science
Courses: Foundations of AI, Algorithms, Machine Learning, Pattern Recognition Computer Vision, Large Language Models

Guru Gobind Singh Indraprastha University, Delhi, India — *Aug 2016 - Sep 2020*
BTech in Computer Science and Engineering, top-4 in class — *GPA: 8.72/10.0*

Experience

Deep Learning Research Intern - The Jackson Laboratory, Bar Harbor, Maine — *Jul 2023 - Dec 2023*
- Researched 5+ *Explainable AI* methods: *Saliency Maps, Integrated Gradients, SHAP, GNN Explainer* for DNA sequence data and *Graph Neural Networks* using *PyTorch Geometric*, leveraging Slurm on High Performance Computing (HPC) clusters.
- Conducted quantitative assessments with cross-entropy and AUC-ROC to evaluate attribution scores against ground truth, optimizing 160+ model architecture configurations *(GCNConv, GraphConv, dropout, L2 regularization)* through *grid search*.

Machine Learning Engineer - Vehant Technologies, Noida, India — *Jun 2019 - Aug 2022*
- Implemented **10+ People and Traffic Analytics** solutions - object detection, tracking, line crossing, action recognition, crowd counting, pose estimation in *Python and C++*, leading to acquisition of **4 new Smart City contracts**.
- *Optimized* multi-GPU end-to-end pipeline **1.5x** for real-time surveillance with low precision - *Mixed Precision, Quantization*.
- Mentored 2 fellow teammates and gave technical sessions on **Edge AI** topics w.r.t. **Video Analytics** for Smart Cities.
- Executed 30+ camera **DeepStream pipeline profiling** to detect bottlenecks, optimizing for maximum **throughput**, minimizing **latency**, and devising efficient hardware distribution strategy for video stream processing across multiple machines.
- **Deployed** and trained **8+ deep learning models** *(YOLO, Faster R-CNN, Mask R CNN, Vision Transformer, ResNet, etc)* using *PyTorch, Tensorflow, Nvidia TensorRT, DeepStream SDK, TAO, Intel OpenVINO, ONNX*, leveraging **MLOps**.
- Integrated *MLFlow, DVC (Data Version Control), Kafka* for ML data handling, leveraging *CI/CD and Docker* for containerization.
Computer Vision R&D Intern — *Jun 2019 - July 2020*
- Applied image processing and fine-tuned models for 15+ multi-label *Pedestrian Attribute Recognition* e.g. clothing, gender.
- Utilized **Semantic, Instance Segmentation** for Indian road scene understanding with U-Net, DeepLab, and Mask R-CNN.

NLP Intern - Arbunize Digital Media Pvt Ltd, Delhi, India — *Jun 2018 - Aug 2018*
- Leveraged **text-processing** techniques, including **Named Entity Recognition** (NER), to parse resumes with *nltk, scikit-learn*.
- Extracted skills from resume and applied **random forest, gradient boosting** with 0.89 F1-score to predict job title.
- Developed **Multinomial Naive Bayes**, **Support Vector Machine** (SVM) classifiers with 0.85 R2 across 4 MBTI personalities, utilizing natural language processing techniques like word embeddings, TF-IDF, **dimensionality reduction** (PCA).

Projects

Visual Question Answering with Generative AI [github]
- Integrated Hugging Face pre-trained tokenizers, Vision Transformer for images, and LLMs for generating answers.
- Achieved 0.3 WUPS with RoBERTa and BEiT outperforming all 4 model combinations viz. ViT, DEiT with BERT, GPT.
- Deployed multimodal VQA in Docker for containerization, Kubernetes for orchestration, ensuring scalable, efficient service.

RAG for Financial Document Summarization [github]
- Leveraged Retrieval Augmented Generation (RAG) with GPT, LLama 2, Gemma models to extract, summarize key performance indicators (KPIs) from 10-Q financial docs with LangChain, HuggingFace for LLM, Chroma for vector databases.

Prompt Engineering and Few-Shot Learning with Flan-T5 for Dialogue Summarization [github]
- Performed prompt engineering on Flan-T5 using dialogsum dataset with instructional prompts and pre-built T5 prompts.
- Experimented with zero-shot, few-shot learning, beam search to assess their impact on summaries' relevance and coherence.
- Optimized model with parameter-efficient fine-tuning (PEFT), LoRA (Low-Rank Adaptation), and 4-bit quantization.

Sentiment Analysis on Amazon SageMaker [github]
- Deployed sentiment analysis model on AWS Sagemaker using PyTorch, with data processing, training on EC2 and S3 data.

Image colorization of historical paintings with GAN [github]
- Leveraged U-Net and pix2pix Convolutional Generative Adversarial Network, to colorize grayscale historical paintings.

Comparative Analysis of Local and Global Temperature Trends with SQL [github]
- Analyzed local and global temperature trends using SQL for data extraction revealing a consistent global temperature rise.

Skills

Programming Languages: Python, C++, C, SQL, Java, R, JavaScript
Machine Learning: PyTorch, Tensorflow, OpenCV, scikit-learn, xgboost, pandas, numpy, nltk, Dask, plotly, LangChain
Tools & Frameworks: Django, Flask, GStreamer, Git, DVC, Docker, Kubernetes, Kafka, Slurm, ONNX, Linux, HuggingFace
MLOps: AWS SageMaker, Azure, GCP, Nvidia DeepStream, TensorRT, MLFlow, Intel OpenVINO, GitHub Actions, CI/CD
